

Bills Must Be Paid

The main objective is to collect money, pay bills before their deadlines, and survive for as long as possible.

The player collects money by clicking on piggy banks. Each round continues until the player's stamina runs out. After each round, the player can either purchase upgrades to collect money more easily and quickly or continue to the next round.

As the player smashes more piggy banks, new types of piggy banks are gradually unlocked. These contain larger amounts of money but are also more difficult to break.

After a certain point, the player must start paying bills. Each bill has a specific amount and a deadline. If the player successfully pays a bill, they can choose one ability from three cards. If the player cannot pay a bill before its deadline, the game ends.

At the end of the session, the player earns coins based on the total amount of money collected. These coins can be used to purchase permanent upgrades that will be available from the beginning of future sessions.
